VINÍCIUS ALBUQUERQUE

Senior Full-stack Engineer

6+ years end to end · React, Next.js, TypeScript · Node.js, NestJS, Go, PHP · PostgreSQL, Docker, AWS · remote
vini.alb13@gmail.com · linkedin.com/in/albuquerque-vinicius · github.com/allbdev · vinicius-albuquerque.com.br · Vila Velha, Brazil

SUMMARY

Senior full-stack engineer with 6+ years taking features from database to UI, across product companies and client projects. Builds the React or Next.js frontend and the Go, NestJS or Laravel API behind it, and has run CI/CD and app releases. Designed, built and runs Path Trader alone, a SaaS now serving about 60 customers.

CORE SKILLS

Frontend · React, Next.js, TypeScript, JavaScript, SolidJS, Tailwind CSS, Radix UI

Backend · Node.js, NestJS, Go, PHP (Laravel), REST APIs, WebSockets, Socket.io, PusherJS

Data · PostgreSQL, Redis, Prisma, Malloy

Testing · Vitest, Jest, React Testing Library, Playwright, Cypress

Tools · Git, GitHub Actions, Bitbucket Pipelines, Docker, AWS, Vercel, Fly, Sentry, Turborepo, pnpm, Cursor, Claude

EXPERIENCE

Frontend Engineer · Bird · Remote · Apr 2024 - Jun 2026

- Built the sales workflows end to end, lead boards, lead configuration and opportunity and deal management, and developed the Go API endpoints behind them for the sales development team.
- Designed a custom objects system for user-defined lead and opportunity attributes, with a dynamic form layer of masked, format-aware inputs.
- Architected a no-code dashboard builder with Malloy, SolidJS and Vega: users compose queries and see them as charts, tables or KPIs.
- Optimized dashboard rendering for enterprise datasets of 1M+ records while keeping it interactive.
- Core contributor to the marketing cloud redesign on a Radix UI and Tailwind CSS component system.
- Established unit and end-to-end testing workflows with Vitest, React Testing Library and Playwright.
- Used AI-assisted development with Cursor, Claude and Antigravity to support delivery.

Senior Software Engineer · MULTTI · Remote · Jan 2022 - Mar 2024

- Mentored junior engineers, guided technical work and improved agile development workflows at a software outsourcing company.
- Architected a real-time chat system using React, PusherJS, WebSockets and virtualized lists.
- Led end-to-end development of a React Native delivery-tracking app with live maps, push notifications and custom UI.
- Built a React and MUI lead management system and a financial-market streaming platform.
- Worked across React and React Native frontends and PHP (Laravel) backends for client projects.
- Modernized CI/CD and infrastructure by introducing Docker, AWS and Bitbucket Pipelines.
- Managed mobile releases, including automated deployments to Google Play and the Apple App Store.

Software Engineer · Solution4apps · Brasília, hybrid · Jan 2020 - Jan 2022

- Led technical delivery of web and mobile projects from discovery through production release.
- Built a React Native app with interactive maps, real-time camera processing, push notifications and NativeWind.
- Developed a responsive real-time financial markets platform using Next.js, Socket.io, Chakra UI and React Spring.
- Delivered an accessible public-sector web application using Next.js and Tailwind CSS.

PROJECTS

- **Path Trader** · path-trader.com.br · Jan 2026 to present. Self-funded SaaS for Brazilian traders with trade journaling, analytics, an AI assistant and a partner program. Built solo, the whole codebase, now serving about 60 customers. Turborepo, Next.js, NestJS, React, TypeScript, Prisma.
- **Vestra** · vestra-financas.com.br · github.com/allbdev/vestra-v2. Mobile-first personal finance PWA with multi-user workspaces and recurring transactions. Turborepo, NestJS, Next.js, Vite, React.

SPEAKING Portuguese (native), English (fluent)

EDUCATION Bachelor's Degree in Information Systems (in progress), Universidade Vila Velha (UVV), expected Jun 2028
